Visits of Karlsruhe Institute of Technology, Campus North

Information on Guided Tours

Visit programs start with a presentation of the main activities of KIT, followed by a tour on the area of 2 km² and a visit of two to three scientific-technical installations.

- Participants with fever, cough, sneeze, or a sore throat will not be admitted. During the past 14 days, visitors should not have had any contact to people tested positively for Covid-19 in this period.
- Campus North can be visited from Monday to Friday between 9 a.m. and 4 p.m. The visit will take about three hours.
- Groups should register for a visit about six weeks in advance, the number of persons should not exceed 10. Participants should not be younger than 16 years.
- Visitors must wear mouth-nose masks in all closed rooms.

Please choose two or three scientific-technical installations for your visit:

**KIT Climate and Environment Center**

- **AIDA** – Large-scale facility for environmental and climate research
- **RADOM** – Weather and climate research at KIT

**KIT Materials Center**

- **KARA** – Large facility for the generation of synchrotron radiation

**KIT Energy Center**

- **bioliq** – Process for the production of synthetic fuel from straw and other biomass feedstocks
- **Energy Lab 2.0** – Interdisciplinary research for the energy transition
- **Wasserstoff-Technikum** – Test center for hydrogen safety research
- **FR2** – Exhibition “Safe and environmentally friendly use of nuclear energy” in the hall of the shut-down reactor
- **Batterietechnikum des KIT** – Research factory for lithium-ion batteries (stationary and mobile applications)

**KIT Elementary Particle and Astroparticle Physics Center**

- **KATRIN** – Large experiment to measure the mass of neutrinos
  - **Persons with cardiac pacemakers will not be admitted**
- **GridKa** – German node of the world computer for particle physicists
